

DRIVE YOUR FUTURE FORWARD

You’re ready to move forward in your life, whether that’s launching a promising career, looking for a promotion in your current field, or simply wanting to sharpen your professional skills. With a Juniata College graduate degree, you can do just that! Explore all the ways a graduate degree from Juniata will give you a boost in the right direction.

- Learn from educators who are well-respected professionals in their field. They’ll pass on their expertise to you and provide you with unique hands-on opportunities for research and field experience.
- Find success in your profession. Most of our students have a job or promotion lined up upon graduation, including nearly 100% of our Master of Accounting students. Plus, we have one of the largest career fairs of any independent college in the state.
- Experience the strong network of Juniata alumni. Alumni are frequently invited into classrooms or the career services office to share their perspective and connect with graduate students about employment opportunities.
- We offer programs in seven distinct fields, presenting you with a variety of opportunities for your individual career goals. Most of our programs are offered online and also in eight-week formats, making it all the easier to fit graduate education into your life.

Master of Accounting

Students in this program are prepared for successful entry into the accounting field with relevant knowledge about management, economics, problem-solving, and more.

Master of Business Administration

We help students develop technical expertise and learn how to lead an organization with authority and responsibility through hands-on business experiences.

Master of Organizational Leadership

This interdisciplinary program teaches effective communication, ethical decision-making, conflict resolution, and other highly valuable skills in for-profit, nonprofit, and public sectors.

Master of Bioinformatics

This program is filled with highly motivated students looking to step up in this constantly evolving field and master interpreting biological data. Further specialize your interests by choosing one of our two tracks, computational or biotechnology.

Master of Data Science

Offered exclusively online, this program is designed for those interested in gaining a new set of skills in performing analysis and applying knowledge from data, regardless of a computer science background or other prerequisites.

Master of Education in Special Education

This program is an exciting addition to our offerings that will prepare a new generation of educators to successfully support students with special needs. Let us help you make a difference in the lives of children and youth today.

Master of Applied Ecology and Natural Resource Management

Students in this program learn how to address complex ecological challenges and are prepared for future careers in environmental science and conservation.
